

## SoftGel Code Stock Products

*To assist our clients, Sphere Healthcare has established a range of commonly consumed products which will be carried ex-stock. This will help minimise lead-times for these products with the view to ensuring that market opportunities for these products are not missed due to temporary out-of-stock situations.*

*For quantities less than a typical batch size of 300,000 SoftGel capsules, a small price premium will apply. We believe that this will be offset by the immediate availability of the product.*

### Product
